Awesome game, It's roster contains great characters from Itachi to Obito, the multiplayer was fun but it's actually dead now considering all the people that played this game moved on to Jump Force or Storm 4, however if you don't have the best PC, or the most amount of money, this game I recommend. So far, the 2nd best Storm game I've played because the tournament "story" is action-packed, the free play allows you to test with characters and it probably contains anyone you can ask for, the Ninja Story tells you information about the Creation of the Akatsuki, Shisui and Itachi, and more. This game is VERY lightweight which is good for people that don't have much time to game, but when they do, they can experience difficulty at a preferable level. However, getting this game if you like heavy combat, fluid fighting mechanics, big rosters and games that are built for better computers, this is not something you should buy. Keep in mind, you can finish this game in only a few days if you're not a gamer, and the combat doesn't flow as mechanically as other storm games.
